magnetic track with spots, grille LED and LED strips

Tailored to You, Designed by Experts

We collaborate with you to design a bespoke home cinema room that meets your exact specifications. Our comprehensive service includes realistic design renderings and technical plans to simplify your build. Need an extra hand? We offer on-site assistance to ensure your project is a success.

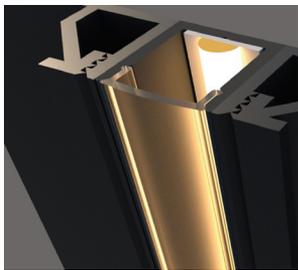

Acoustic Excellence, Seamlessly Integrated

We craft bespoke home cinemas using our signature fabric wall and ceiling stretch systems. Choose from an extensive library of acoustically transparent fabrics to create a stunning aesthetic that discreetly conceals speakers and hardware without compromising sound quality.

Project Spotlight: This installation features our precision-engineered stretch profiles upholstered in Luxo Onyx. The system integrates high-performance acoustic absorption foam, custom diffusers, and a sleek magnetic track lighting system for a flawless, modern finish.

magnetic track with LED strips

Fabric stretch profiles

Our fabric tension profile with integrated LED strip to create a design as shown.

Behind the acoustic fabric we place our acoustic absorption foam and diffusers, and of course all speakers.

Magnetic light track

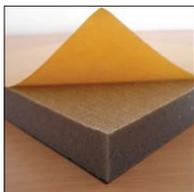

Our 48v magnetic track lighting offers endless possibilities and quality lighting. All spots or LED strips are dimmable, changable from warm to cool white and controllable using DALI or TUYA smart.

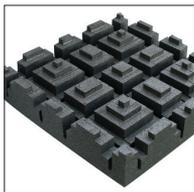

Discover our acoustic products:

Our fabric wall and ceiling tension profiles. 25mm high to fit our acoustic absorption foam available in 2m length in box of 35pcs

Absorbs mid and high-frequency sounds, improving clarity and sound quality. fire rated with excellent absorption qualities
size: 1200 x 800 x 25mm

Manufactured from dense XPS for strength and precision diffusion, reduces flutter echo and improves sound distribution. Lightweight and simple to install on walls or ceilings.
size: 600 x 600 x 150mm

Designed for mid-frequency sound absorption (300-600 Hz), improving clarity and speech intelligibility. Reduces echo and unwanted reflections for a balanced, immersive sound experience. Elegant wood veneer finish adds warmth and style to any space. size: 500 x 500 x 50mm

Bass trap is an exceptional acoustic solution specifically designed to absorb low-frequency sounds in the range of 125-250 Hz. Its unique design and construction make it ideal for reducing excess sound energy in the corners.
size: 300 x 300 x 1000mm

Enhance both the acoustics and aesthetics of any space with our print acoustic panel. Designed to combine high-performance sound absorption with customisable printed visuals.
size: bespoke sizes

Discover our acoustic soundproofing products:

Silence, Engineered.

Experience the ultimate in sound insulation. Our frameless wall soundproofing system designed for projects that demand the highest level of acoustic performance. With a thickness of 63 mm, it delivers certified sound insulation while integrating smoothly.

Discover our lighting solutions:

Our 48v magnetic track systems offer great flexibility and stunning design. Choose from LED strips, LED grills, spots, and even bluetooth speakers.

Innovation in Every Detail. DIGITAL PIXEL represents a new era in flexible lighting technology. Our systems do more than illuminate—they breathe life into architecture and evoke the extraordinary.

Discover our acoustic fabrics and curtain service:

We offer a wide range of acoustic transparent fabrics. Ideal to use with our wall and ceiling stretch profiles or as curtains.

Custom made curtain service:

We make curtains for your project using our luxurious fabrics.
