

A photograph of a modern home cinema lighting system. The ceiling is dark, and a track lighting system is installed, featuring several recessed spotlights. One spotlight on the ceiling is illuminated, casting a bright beam of light. On the wall, there are two long, thin, illuminated strips, likely LED strips, mounted vertically. The overall atmosphere is dark and focused on the light from the fixtures.

# LINED

LINED combines a minimalist design with modern lighting technology.

A diverse range of spotlights, equipped with a 48V adapter, can easily be clicked into the track anywhere thanks to an ingenious magnetic system.

The range includes spotlights with a beautifully focused light, as well as strips that provide uniform light distribution.

They are all available in switching light colors 3000K to 2700K, dimmable and Tuya/DALI smart.

The track system is modular and can be installed surface-mounted, or suspended. The great flexibility and variety of models enable numerous applications in a wide variety of projects, primarily in boutiques and shops, hotels, restaurants and bars, as well as in private homes.

LINED 48v Tracks are compact and sleek, giving the lighting an added architectural character.

The diverse range of spotlights, equipped with a 48 V adapter, can be easily clicked anywhere on the track thanks to a clever magnetic system.
